

# Customized Face Plates and Panels

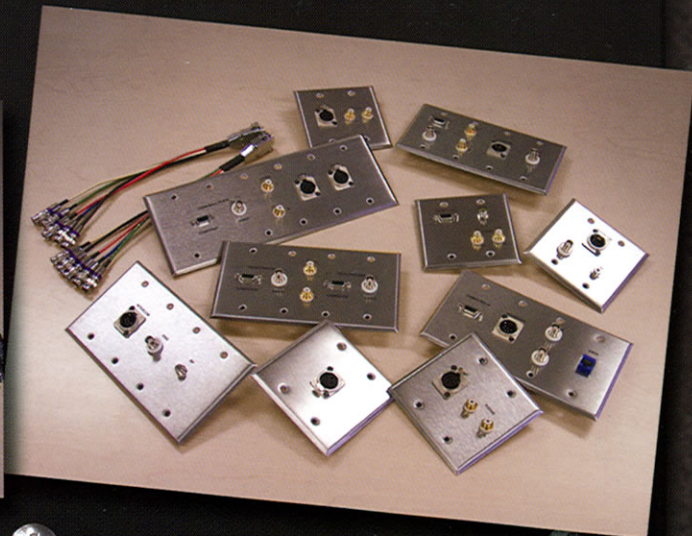

## Customized Face Plates and Panels

Four Star Wire & Cable, Inc. offers a full line of customizable face plates and panels to meet a broad spectrum of computer networking and audio systems requirements. Our technicians work directly with your organization to assess your needs and deliver plates and panels that are precision fabricated based on the most advanced CAD/CAM technology. Each of our plates and panels can be completed with customized lettering or numbering to promote ease of use as well as expand on your corporate logo to satisfy proprietary identification demands.

Rapid turnaround and an unwavering commitment to quality ensures that our wall-, rack- or equipment-mounted plates and panels exceed the most rigorous standards for a range of specialized uses, including:

- Advanced Audio/Visual Production
- Studio and Live Broadcasting
- Professional Sound and Recording
- Live-Performances
- Product Research and Development
- Testing and Quality Control
- Machine and Computing Networks

Four Star's premium plates and panels complement our comprehensive line-up of quality cables and connectors, which have cultivated a reputation over the years for durability, innovation and value. For your unique plate and panel demands, our bottom line remains: "If you think it, we will create it!"

## **A Process for Proven Performance**

Four Star's established track record within the marketplace, backed by our ISO 9001 certification, underscores our strategic systems planning, exacting fabrication techniques and proactive customer service. Our professionals invest the time to under-stand your current and future networking requirements. We place an emphasis on listening to each customer's specific requests, providing products of maximum utility, quality and flexibility.

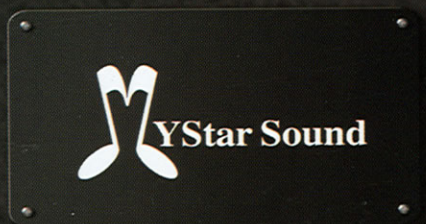

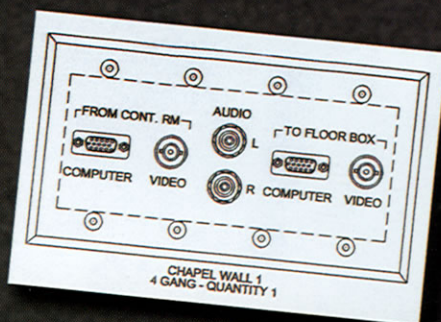

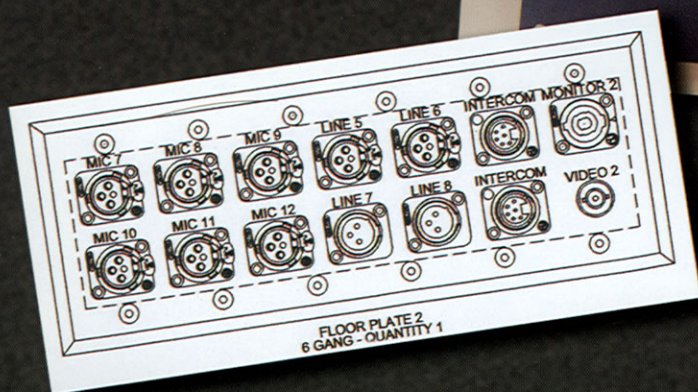

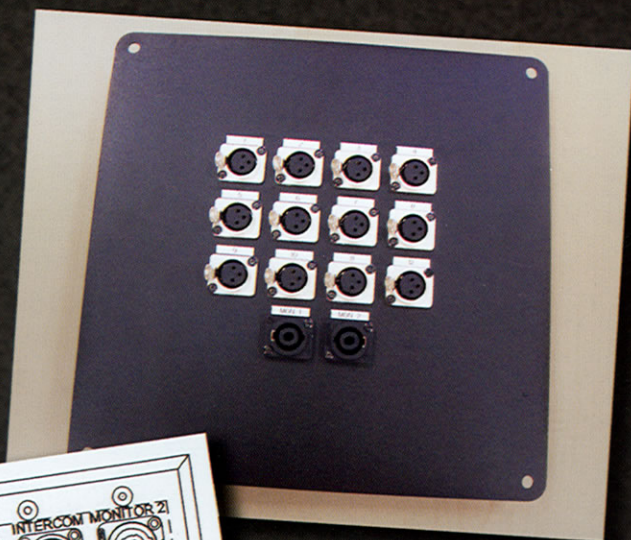

Plate drawings and specifications are created to accommodate your demands for a range of connectors, switches, custom assembled controls and much more. Plates can be delivered cut to order for future component application, or assembled in-house with any combination of wiring, cable and connectors from our state-of-the-art inventory. The end result is a one-stop, turnkey solution and true added value. Panels and plates are available in a variety of finishes and colors, including:

- Stainless Steel
- Aluminum
- Brass
- Powder Coat
- Anodized

Four Star customizes plate and panels with designated script for clarity and efficiency, while durable, "road-worthy," labeling is ideal for clearly identifying your rack-mounted and transportable hardware. Our advanced laser etching system generates the most precise letters, numerals and illustrations. The auto-mated laser creates detailed reversed graphics on lamicoid surfaces, while silk-screen labeling is also available for your custom lettering and logo labeling needs.

Once fabricated and labeled, each order is thoroughly re-inspected for quality and completion prior to shipping. Plates and panels are securely packaged to ensure against surface and component damage. Shipping labels feature job numbers for tracking and accounting ease.
